LOCATION

Nashville Software School
500 Interstate Blvd S
Ste 300
Nashville, TN 37210

WEB DEVELOPMENT JUMPSTART

AN INTRODUCTION TO WEB DEVELOPMENT TECHNOLOGIES & CAREERS

Are you intrigued by the world of web development? Maybe you have started self-studying and want a bit of guided direction; maybe you have been considering a career change and want to test the waters; maybe you see basic knowledge of HTML, CSS and JavaScript as an asset to your current career. If you are looking for a in-person introduction to web development foundations, the Web Development Jumpstart course is designed for you.

WHAT WILL THE COURSE COVER?

- How to build and deploy your own website
- Demystifying web technologies & software development
- Basic understanding of core web languages: HTML, CSS and JavaScript
- An overview of career options in software development
- What options are available to go deeper: through self-study, bootcamps, traditional education or online resources.

For those that are considering an NSS bootcamp, materials covered in this course will give you a jumpstart on your pre-work

HOW WILL YOU LEARN THE MATERIAL?

- **In-person instruction:** Introduction to new topics will be covered by instructors who are working software professionals. They will cover topics through a combination of lecture and live-coding.
- **Mentored exercises:** Apply your understanding of these new topics by *doing*, but don't worry, you'll have access to instructors if/when you need guidance.
- **Real-world project:** What good is all this knowledge if you can't apply it? By the end of this course, you will be able to build your own personalized website and share it with the world.
- **Materials to keep going:** Whether using your new-found skills in your existing career, continuing your journey with self-study, or taking the next steps to pursue a career in web development, we are here to give you personalized guidance on how to continue after the end of the course.

WHO IS NASHVILLE SOFTWARE SCHOOL?

Nashville Software School is a non-profit where a person with aptitude, motivation, passion and commitment can learn the craft of software development.
